PRESS RELEASE

Naarak Studio Launches Viper FTP 4

Viper FTP program, a software that helps Mac OS X users to manage their files and enhance their everyday experience has been launched by Naarak Studio

Poznań, Poland - July 21st, 2017: macOS users now have at their disposal a powerful file manager; Viper FTP version 4 has been launched. A software developed by Naarak Studio, a reputable company offering innovative solutions for macOS, [Viper FTP](#) allows the users to manage files. The product enables users to take full advantage of services offered by FTP, SFTP, Web Dav and Amazon S3. With the program searching, viewing and editing files directly on a remote server using editor of user choice is made easier. With its implemented functions, the program has been described as a great tool for enhancing improvements in everyday work. For those who maintain a website, have activities which require them to upload files, documents or photos, even uploading content on their YouTube account, the new tool by Naarak Studio makes the process easy and quick.

According to the developers transferring process is easy and quick, it can be clicked and dragged or multi selecting and then dragging the items as a group.

Apart from file transfer, Viper FTP also allows the user to book mark personal, work and social upload servers through FTP. It also makes searches of files and information on both [computer and remote servers](#) easier and fast.

For those worried about security, the developers say that Viper FTP provides high secure AES-256 encryption in CBC mode of single files using password. All that the user has to do is right-click the file needed to be encrypted or decrypted and entering your password in a dialog box.

Users who want to try the program are free to evaluate it for a limited period of time for free. When they are happy and want to continue using it they can purchase a license key for extended usage. Viper FTP is also available at the App Store.
