

## FOR IMMEDIATE RELEASE

### Naarak Studio Introducing New App - Viper FTP

**Summary:** Naarak-Studio, a Mac OS X development team is introducing its new application Viper FTP, the practical and reliable Mac FTP client. The app can be installed on all computers according to the user's preferences absolutely free.

**May 13, 2015:** Naarak-Studio is presenting its new app Viper FTP for MAC users. The application is a helpful and commanding file manager for Mac OS X along with a remarkable user interface that makes it easy to apply.

Speaking to the media, a spokesperson from the Naarak-Studio stated, *"Yes, we are presenting our new application Viper FTP - Mac FTP client. We are a team of highly trained and experienced professionals developing pioneering software solutions for Mac OS X. We use the most recent techniques with determination, flexibility and alertness to assist users in accomplishing their objectives with utmost productivity."*

He further added, *"Naarak Studio assures clients with 100 percent customer satisfaction by providing perfect and practical software products. We aim to be the most preferred name when it comes to developing and offering hi-tech software solutions."*

Viper FTP helps in local and remote file management (FTP, SFTP, WebDav, Amazon S3, and YouTube-upload). The application allows users to manage everything including Last connections, Bonjour, Bookmarks and Favourites at one place. One can also convert remote files and folders into HTTP/HTTPS address with an immediate email option. They can check the record of file operations (what, when,

where with a server reply) and search, view and edit files straight on a remote server.

All hidden and system files are visible allowing users to locate a file just by typing its name. Viper FTP allows users to share items via Mail app, make the HTTP URL of a specific file and swiftly compare files and folders. Users can find a number of exclusive features by purchasing the app. They will get a toolbar offering immediate access to the bookmarked servers, and can easily access to LAN Bonjour servers, check the record and trace log. Users can also transfer files in the background. However, individuals who do not need to organize multiple FTP accounts can use the Lite version of Viper FTP available for free.
